

Packaging

In general, paying particular attention in packaging a product is simple but at the same time is fundamental in order to protect the technical characteristics of the seal. For this reason Roverplastik takes great care of the packaging and storage of their seals. In fact, only cardboard packaging is used to assure a complete protection of the product, which is also easy to handle.

Roverplastik, with a wide range of packaging, is able to cover all possible customer needs: bobbins of multiple dimensions, boxes for discs and boxes for bars.

Mod. A28

Mod. A28+A28/1

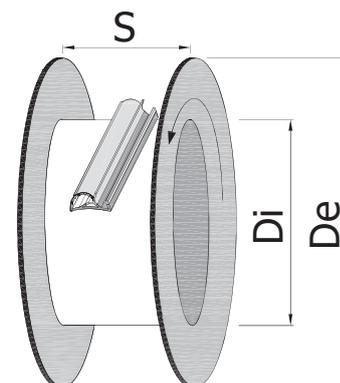

MOD. A28 - Decoiler for weatherstrip coil

The Roverplastik's decoiler "A28" is, thanks to its extremely versatility and handling, the best tool for decoiling for any type of weatherstrips.

Features:

- * Aluminium chassis;
- * Possibility to carry up to 4 coils (A28+A28/1);
- * Adjustable for coils with diameters and different thicknesses;
- * Supplied with braked wheels.

Unrolling direction: the images of the seals on the catalogue, on the labels or on the technical data sheets represent the direction of unrolling. See the adjacent figure.

Minimum order is four boxes for products that are not available on stock. Contact us before ordering less than four boxes to be sure they are really available.

PACKAGING	TYPE	S Thickness	De Ext. size	Di Int. size	Box W x H x B
W01	COIL	20 cm	50 cm	35 cm	50,6 x 50,6 x 21,0
