

## TYPES DE RAINURES

En combinant les différents types de rainures, le type d'emballage et la présence ou non de protection, on peut obtenir le code de le joint souhaité.

Par exemple, en choisissant un joint pour rainure de type 2, avec emballage W04 comme le 426, en matériau K, sans protection, et avec enroulement droit, on obtient :  
A 426 K BOB DIR SP
